

**Subject: plan for progressing MRA and PCBA documents**

**Date: 2011-03-01**

- 1) Get PGP to vote on OP18 (this is in progress – and going well so far).
- 2) IEC split of docs between those to be approved at the two levels defined in the OP18. I need to determine and propose to WG1 those that are 'high level procedures, and those that can be approved by WG1 without reference to higher authority for each of MRA and PCBA systems.
- 3) Get agreement of high level docs (i.e. OP) from WG1 by email and then send to IEC for approval, and onwards to PGP for vote
- 4) At Valencia WG1 will deal with any comments received from IEC or PGPC
- 5) Re-issue amended documents to PGP for vote (if necessary)
- 6) Follow on with finalisation and approval lower tier docs within WG1
- 7) Cancun meeting will then be devoted to implementation planning, including EFNDT and (if appropriate) APCNDT transitional arrangements for PCBs registered under those regional MRA (subject to agreement within the regional committees).
